

# COVID-19 Weekly Bulletin

## Introduction

After the seven CHAs in the IMA/ACHAP project forwarded their support requirements, the funds were released into their accounts. So far, all the CHAs have confirmed receipt of the funds and have already started utilising them.

In the course of last week, the seven CHAs participated in an

online meeting where the indicators for the project were discussed and agreed on. Going forward, IMA will share, through ACHAP, IEC materials targeting health workers, community health volunteers and religious leaders. These materials/messages will be shared weekly with the CHAs, who will then share them with their networks.

## Summary of cases and actions taken per country

### Cameroon
