

Face masks:

Guidance for faith organizations

- Faith organizations such as churches should follow the same guidance for masks use as communities.
- If possible, churches should try to avoid overcrowding and allow enough space so that each person can stand/sit one meter apart.
- If possible, churches can offer remote sessions.
- Church/faith-based guidance on mask use in the community should follow country guidance.
- Medical masks should be left for medical professionals.
- If a person is sick, they should stay home and not attend church services, while also contacting a health facility. This will help to stop the spread of COVID-19.
